In case of Communication Failure, pilots should use the Communication Failure Procedure, immediatly informing the ATC via ACARS (Roblox Chat). If a STAR was assigned, direct to the last waypoint of your flightplan (RENTS, JACKI, BOBUX). If no STAR's were assigned, direct to Paphos VOR and hold FLO25 until further notice.

3. Departures

If Runway 17 in use, pilots should expect minimal delays due to a Ruway crossing. They should also caution traffic from Larnaca Intl. If Runway 35 in use, Pilots can request faster taxi speed due to the lenght of the Charlie taxiway. They should also caution traffic from McConnell AFB. For Pushback and Start-Up, pilots can do it at own discretion unless othewise told by ATC.
